The Model 2226 CRT/Keyboard Console

Wang Laboratories, Inc. is pleased to announce the Model 2226 CRT/Keyboard Console which provides an attractive and economically-priced console terminal for the 2200S and 2200T Series Central Processing Units. This console terminal consists of a 12" diagonal CRT and an Upper/Lowercase Alphanumeric/BASIC Keyword Keyboard in one sleek, handsome, compact unit.

The Model 2226 is comparable to the 2220 Console (see Product Bulletin No. 101). The major differences are the enlarged CRT and the removal of the Tape Drive.

The Wang Model 2226 consists of:

1. An integrated keyboard which has two modes of operation: Keyword/A and A/a. In Keyword/A mode, shifted alpha keys produce BASIC words; unshifted alpha keys produce uppercase letters. A/a mode functions as a standard typewriter. Unshifted alpha keys produce lowercase letters; shifted alpha keys produce uppercase letters.
2. A 12" diagonal screen which allows the user to view his calculations and program text instantly. The display capacity is 16 lines with up to 64 characters per line at a rate of approximately 65 micro-seconds/character.
3. The EDIT Mode which is a standard (S and T) CPU feature.
4. Contrast and brightness controls which provide for sharp and clear output on the CRT screen.

Options available for the 2226 are:

- Option 30 - Upper/Lowercase CRT Display
- Option 31 - Audio Signal
- Option 32 - Keyboard Clicker
- 25 ft. or 50 ft. Extension Cables

FEATURES

Model 2226 Integrated CRT

Model 2226 Integrated BASIC Keyboard

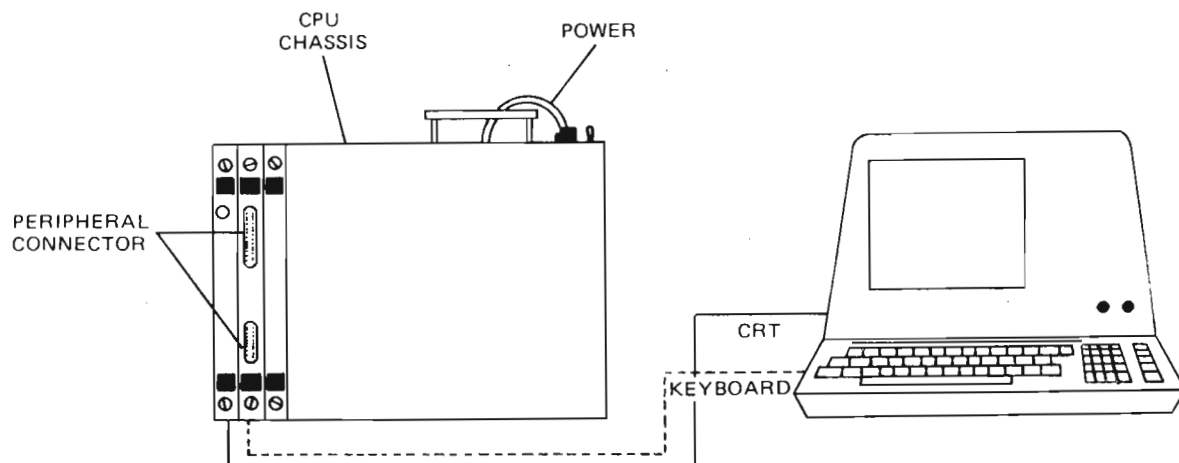

Compact size, light in weight

BENEFITS

Displays up to 1024 characters of current programs, calculations, results, data and printed output on a 12" diagonal screen.

Most BASIC Words are entered as single keystrokes. Alpha characters can be entered in either upper or lowercase; all numerics and many mathematical functions are entered with a single keystroke. Sixteen Special Function Keys provide up to 32 subroutine entry points for the BASIC program or they may customize text entry operations to specific 2226 applications. They are also used to provide a power screen text editing capability. The 2226 can also be used as a standard typewriter keyboard.

Allows efficient use of available office space and permits easy relocation.
